

Grantium's Indirect Logic

If your funding source supports entry of an Indirect Budget, the following logic will be activated:

1. The Administration Activities and Budget page will be visible and will contain rows in grid showing the Indirect Earned by source and will allow you to enter an Indirect Budget. This page also shows your Indirect Rate. If the Indirect Rate shown is zero, please contact your Primary Fiscal Contact shown on this page to arrange for an Indirect Rate.

Source	Perkins Basic
Indirect Rate	2.16%
Indirect Earned	\$1,293.82
Indirect Budget	\$210.00
Indirect Balance	\$1,083.82

Grantium will calculate Indirect Earned shown above based on **ALL** your budget entries. **You are responsible for not budgeting for indirect earned on contracted services over \$25,000 and equipment.** Grantium includes these in the Indirect Earned as it is impossible to determine this type of activity during your budget entry.

Grantium will not allow you to submit your application if your Indirect Budget is greater than Indirect Earned.

- a. In addition, if the funding source has a cap on administration dollars you can enter, then Grantium will not allow you to submit your application if your Indirect Budget plus any Administrative Activities and Budget lines you enter are greater than the Admin Available. You will see the rows below in this grid to help you track your administration budget entry.

Admin Cap (0%=No cap)	5.00%
Admin Available (if capped)	\$9,209.69
Admin Activities Budget (Includes Indirect Budget if allowed)	\$210.00
Total Admin Remaining (if capped)	\$8,999.69

- b. If Grantium has calculated an Indirect Earned and you do not want to enter an Indirect Budget, you must click on the checkbox below on this page to be able to submit your application.

The applicant chooses to not budget indirect administrative costs.:

Check this box to allow submission if indirect is earned but not being budgeted.

Grantium's Indirect Logic

2. If you have an Indirect Rate, Grantium will display the question below in the Start Here page.

Do you want Grantium to help you plan budgeting Indirect? No

Choose Yes above if you want Grantium to activate logic to help you budget for maximizing your indirect earned.

Answering 'Yes' to this question will activate additional logic in Grantium described in item 3 below.

Note: Regardless of how you answer this question, Grantium will still do logic as noted in item 1 above.

3. If you answer Yes to question noted in item 2 above, the following additional logic will be displayed on the Program Activities and Budget page to help you in planning your indirect budget.
- a. There will be a row showing Indirect Earned that will be updated as you enter your budget.

Source	Perkins Basic
Admin Activities Budget (Includes Indirect Budget if allowed)	\$210.00
Program Activities Budget	\$59,899.00
Total Remaining	\$124,084.75
Indirect Earned	\$1,293.82

- b. As you do line entry you will also see the Indirect Earned being calculated.

The below 'Current Balances' grid will update only when data entered on this page is saved.

Source	Perkins Basic
Total Remaining	\$124,084.75
Indirect Earned	\$1,293.82

- c. Grantium will track your budget entry looking for the 'sweet spot' to allow you to maximize your Indirect Earned without going over your allocation. If you budget too much to maximize your Indirect Earned, you will see the message below on this page.

WARNING
You have budgeted more than you should to maximize Indirect Earned.
To maximize Indirect Earned, Total Remaining + Admin Activities Budget above
should be close to Indirect Earned without going under.
Please adjust budget accordingly if you wish to maximize Indirect Earned.

This is just a warning as Grantium does not require you to budget what you earned.
